

REMARKS

The specification has been amended to insert section headings. These changes should be entered because no new matter has been introduced.

Claims 1-9 and 19-25, as amended, appear in this application for the Examiner's review and consideration. The amendments were to correct the spelling of "centerline" so that no new matter has been introduced. Also, these claims were reviewed by the European Patent Office as the International Searching Authority during the processing of International application PCT/CA2004/000016 and they should be examined together in this application.

Claims 10-18 and 26-35 were cancelled without prejudice to file one or more divisional or continuation applications for the subject matter or those claims, or to represent the subject matter of these claims during prosecution. Furthermore, applicant notes that claims 19-25 were found to meet the criteria for novelty, inventive step, and industrial applicability by the EPO so that they should be in condition for allowance.

An abstract is attached hereto on a separate sheet.

Please enter these changes prior to examination.

Respectfully submitted,

Date

7/13/05
